Guidance for building plugins for Copilot

Start with Copilot Studio if you want...

- Low-code, SaaS based tooling
- Text based responses
- Rapid development environment
- Managed infrastructure

...and use VS Code + Teams Toolkit when you...

- Have an existing or want a Teams app in addition to a plugin or want to have more control over code
- Want to customize your plugin UX with adaptive cards
- Need support for CI/CD development practices out of the box (GitHub CodeSpaces)
- Need to manage hosting infrastructure yourself
